

Safer Clinic (QuIC FIT) Scorecard, Bonthe

Progress towards Emergency Obstetric and Neonatal Care (EmONC) status, May 2015

The Safer Clinic (QuIC FIT) Scorecard uses data collected by brief telephone interviews with facilities to determine readiness to provide quality EmONC services. It complements the more resource intensive Facility Improvement Team (FIT) assessments, providing data about EmONC status at points in time between FIT visits. It gathers data about the same seven enablers for providing EmONC services as FIT, but focuses on the presence of enablers during the last 24 hours only.

Performance rating	Score	Facility has:
 Green	4	Met all criteria
 Yellow	3	Mostly met criteria
 Orange	2	Partially met criteria
 Red	1	Not met criteria

QuIC FIT also asks direct questions about the ability to perform nine signal functions i.e. the functions essential to basic or comprehensive EmONC. This is in contrast to FIT which assesses EmONC status based on enabler questions only.

Enabler answers are cross-checked against responses from enabler questions to determine whether a signal function can be performed.

Please note that the criteria to achieve each enabler and signal function are different for hospitals and CHCs because CHCs are not expected to perform complicated deliveries that need instrumental or operative procedures.

The QuIC FIT interview contains fewer questions than FIT and it is possible, therefore, that FIT and QuIC FIT generate slightly different traffic light scores. Nevertheless, both FIT and QuIC FIT present data in simple to interpret scorecards which support decision making and can motivate action for change.

Spot checks to validate QuIC FIT results are incorporated within supportive supervision visits.

EmONC status	Facility has:
CEmONC	Able to perform Comprehensive Emergency and Neonatal Care signal functions
BEmONC	Able to perform Basic Emergency and Neonatal Care signal functions
Blank	Unable to perform sufficient signal functions to achieve Emergency Obstetric Care status

Ability to perform signal function		
	Yes	Able to perform signal function
	No	Not able to perform signal function
