

Safer Clinic (QuIC FIT) Scorecard, Kailahun

Progress towards Emergency Obstetric and Neonatal Care (EmONC) status, September 2015

The Safer Clinic (QuIC FIT) Scorecard uses data collected by brief telephone interviews with facilities to determine readiness to provide quality EmONC services. It complements the more resource intensive Facility Improvement Team (FIT) assessments, providing data about EmONC status at points in time between FIT visits. It gathers data about the same seven enablers for providing EmONC services as FIT, but focuses on the presence of enablers during the last 24 hours only.

Performance rating	Score	Facility has:
 Green	4	Met all criteria
 Yellow	3	Mostly met criteria
 Orange	2	Partially met criteria
 Red	1	Not met criteria

QuIC FIT also asks direct questions about the ability to perform nine signal functions i.e. the functions essential to basic or comprehensive EmONC. This is in contrast to FIT which assesses EmONC status based on enabler questions only.

Enabler answers are cross-checked against responses from enabler questions to determine whether a signal function can be performed.

The criteria to achieve each enabler and signal function are different for hospitals and CHCs because CHCs are not expected to perform complicated deliveries that need instrumental or operative procedures.

The QuIC FIT interview contains fewer questions than FIT and it is possible, therefore, that FIT and QuIC FIT generate slightly different traffic light scores. Nevertheless, both FIT and QuIC FIT present data in simple to interpret scorecards which support decision making and can motivate action for change.

Spot checks to validate QuIC FIT results are incorporated within supportive supervision visits.

EmONC status	Facility has:
CEmONC	Able to perform Comprehensive Emergency and Neonatal Care signal functions
BEmONC	Able to perform Basic Emergency and Neonatal Care signal functions
Blank	Unable to perform sufficient signal functions to achieve Emergency Obstetric Care status

Ability to perform signal function

Yes

Able to perform signal function

No

Not able to perform signal function

Safer Clinic Scorecard: **KAILAHUN** District

Enabler	Kailahun Maternity	Buedu CHC	Daru CHC	Jojoima CHC	Koindu CHC	Pendembu CHC
 Water and Sanitation				No data		
 Electricity				No data		
 Referrals				No data		
 Equipment				No data		
 Laboratory				No data		
 Staffing				No data		
 Drugs				No data		
Comments/Actions	Running low on Ampicillin and misoprostol	Ambulance takes over 2 hours to reach facility	Need ambulance, magnesium sulphate, MVA kit, MVE	Call was unsuccessful	Need electricity supply and lab technician	DHMT needs to be replenishing oxytocin

Safer Clinic Scorecard: **KAILAHUN** District Signal Functions

Signal function	Kailahun Maternity	Buedu CHC	Daru CHC	Jojoima CHC	Koindu CHC	Pendembu CHC
SF1a: Administer Parenteral antibiotics- mother				No data		
SF1b : Administer Parenteral antibiotics- newborn				No data		
SF2: Administer Uterotonic drugs (such as Parenteral oxytocics)				No data		
SF3: Parenteral anti-convulsants				No data		
SF4: Manual removal of placenta				No data		
SF5: Removal of retained products				No data		
SF6: Assisted/ instrumental vaginal delivery				No data		
SF7 : Neonatal resuscitation				No data		
SF8: Blood transfusion		NA	NA	NA	NA	NA
SF9: Perform surgery		NA	NA	NA	NA	NA
Key actions to take to address shortfall in performance	No comments	No comments	Lack MVA kit and MVE	Call was unsuccessful	No comments	No comments
