

Safer Clinic (QuIC FIT) Scorecard, Pujehun

Progress towards Emergency Obstetric and Neonatal Care (EmONC) status, September 2015

The Safer Clinic (QuIC FIT) Scorecard uses data collected by brief telephone interviews with facilities to determine readiness to provide quality EmONC services. It complements the more resource intensive Facility Improvement Team (FIT) assessments, providing data about EmONC status at points in time between FIT visits. It gathers data about the same seven enablers for providing EmONC services as FIT, but focuses on the presence of enablers during the last 24 hours only.

Performance rating	Score	Facility has:
 Green	4	Met all criteria
 Yellow	3	Mostly met criteria
 Orange	2	Partially met criteria
 Red	1	Not met criteria

QuIC FIT also asks direct questions about the ability to perform nine signal functions i.e. the functions essential to basic or comprehensive EmONC. This is in contrast to FIT which assesses EmONC status based on enabler questions only.

Enabler answers are cross-checked against responses from enabler questions to determine whether a signal function can be performed.

The criteria to achieve each enabler and signal function are different for hospitals and CHCs because CHCs are not expected to perform complicated deliveries that need instrumental or operative procedures.

The QuIC FIT interview contains fewer questions than FIT and it is possible, therefore, that FIT and QuIC FIT generate slightly different traffic light scores. Nevertheless, both FIT and QuIC FIT present data in simple to interpret scorecards which support decision making and can motivate action for change.

Spot checks to validate QuIC FIT results are incorporated within supportive supervision visits.

EmONC status	Facility has:
CEmONC	Able to perform Comprehensive Emergency and Neonatal Care signal functions
BEmONC	Able to perform Basic Emergency and Neonatal Care signal functions
Blank	Unable to perform sufficient signal functions to achieve Emergency Obstetric Care status

Ability to perform signal function

Yes

Able to perform signal function

No

Not able to perform signal function

Safer Clinic Scorecard: PUJEHUN District

Enabler		Pujehun Maternity	Bumpeh CHC	Gbondapi CHC	Potoru CHC	Sahn Malen CHC	Zimmi CHC
	Water and Sanitation						
	Electricity						
	Referrals						
	Equipment						
	Laboratory						
	Staffing						
	Drugs						
Comments/Actions		Just received supply	Need elbow gloves, sutures, IV cannulas, syringes and needles, liquid soap, and lab technician	Need ambu bag for new born resuscitation and liquid soap	Need gentamycin, ampicillin, and ambulance to take less than 2hrs when needed	Need dressing materials, elbow gloves, liquid soap, and lab technician	Need sutures, liquid soap, and urgent electricity supply

Safer Clinic Scorecard: PUJEHUN District Signal Functions

Signal function	Pujehun Maternity	Bumpeh CHC	Gbondapi CHC	Potoru CHC	Sahn Malen CHC	Zimmi CHC
SF1a: Administer Parenteral antibiotics- mother						
SF1b : Administer Parenteral antibiotics- newborn						
SF2: Administer Uterotonic drugs (such as Parenteral oxytocics)						
SF3: Parenteral anti-convulsants						
SF4: Manual removal of placenta						
SF5: Removal of retained products						
SF6: Assisted/ instrumental vaginal delivery						
SF7 : Neonatal resuscitation						
SF8: Blood transfusion		NA	NA	NA	NA	NA
SF9: Perform surgery		NA	NA	NA	NA	NA
Key actions to take to address shortfall in performance	No comments	Lack skills to perform SF 2 and 3	No comments	Lack drugs and equipment to perform SF 1a&b	Lack elbow gloves	No comments
