

Safer Clinic (QuIC FIT) Scorecard, Tonkolili

Progress towards Emergency Obstetric and Neonatal Care (EmONC) status, September 2015

The Safer Clinic (QuIC FIT) Scorecard uses data collected by brief telephone interviews with facilities to determine readiness to provide quality EmONC services. It complements the more resource intensive Facility Improvement Team (FIT) assessments, providing data about EmONC status at points in time between FIT visits. It gathers data about the same seven enablers for providing EmONC services as FIT, but focuses on the presence of enablers during the last 24 hours only.

Performance rating	Score	Facility has:
 Green	4	Met all criteria
 Yellow	3	Mostly met criteria
 Orange	2	Partially met criteria
 Red	1	Not met criteria

QuIC FIT also asks direct questions about the ability to perform nine signal functions i.e. the functions essential to basic or comprehensive EmONC. This is in contrast to FIT which assesses EmONC status based on enabler questions only.

Enabler answers are cross-checked against responses from enabler questions to determine whether a signal function can be performed.

The criteria to achieve each enabler and signal function are different for hospitals and CHCs because CHCs are not expected to perform complicated deliveries that need instrumental or operative procedures.

The QuIC FIT interview contains fewer questions than FIT and it is possible, therefore, that FIT and QuIC FIT generate slightly different traffic light scores. Nevertheless, both FIT and QuIC FIT present data in simple to interpret scorecards which support decision making and can motivate action for change.

Spot checks to validate QuIC FIT results are incorporated within supportive supervision visits.

EmONC status	Facility has:
CEmONC	Able to perform Comprehensive Emergency and Neonatal Care signal functions
BEmONC	Able to perform Basic Emergency and Neonatal Care signal functions
Blank	Unable to perform sufficient signal functions to achieve Emergency Obstetric Care status

Ability to perform signal function

Yes

Able to perform signal function

No

Not able to perform signal function

Safer Clinic Scorecard: TONKOLILI District

Enabler	Magburaka Maternity	Bumbuna CHC	Hinistas CHC	Makali CHC	Masingbi CHC	Yele CHC
 Water and Sanitation						
 Electricity						
 Referrals						
 Equipment						
 Laboratory						
 Staffing						
 Drugs						
Comments/Actions	Need MVA kit, liquid soap, staff for routine delivery and ambulance service	Need MVA kit, sutures, and liquid soap	Need ambulance service, staff for routine delivery, electricity, water in labor ward, autoclave, liquid soap, sutures, dressing material, chlorexhydine and oxytocin	Need water supply in labor ward, MVA kit and MVE and lab technician	Need MVA and MVE kits and lab technician	Need ambulance service, lab technician, liquid soap, sutures, dressing materials, MVA kit, MVE and oxytocin

Safer Clinic Scorecard: **TONKOLILI** District Signal Functions

Signal function	Magburaka Maternity	Bumbuna CHC	Hinistas CHC	Makali CHC	Masingbi CHC	Yele CHC
SF1a: Administer Parenteral antibiotics- mother						
SF1b : Administer Parenteral antibiotics- newborn						
SF2: Administer Uterotonic drugs (such as Parenteral oxytocics)						
SF3: Parenteral anti-convulsants						
SF4: Manual removal of placenta						
SF5: Removal of retained products						
SF6: Assisted/ instrumental vaginal delivery						
SF7 : Neonatal resuscitation						
SF8: Blood transfusion		NA	NA	NA	NA	NA
SF9: Perform surgery		NA	NA	NA	NA	NA
Key actions to take to address shortfall in performance	Need MVA kit	Need MVA kit	Need oxytocin supply and training for SF 6	Need MVA and MVE kit	Need MVA and MVE kit	Lack oxytocin and Kits for MVA and MVE
